- Trading of own or rented property and land use rights. Details: Real Estate Operations.
- Wholesale of agricultural raw materials (except wood, bamboo) and live animals (not conducted at the head office).

1.4 Normal operating cycle:

The normal operating cycle of the Company is from 15 days to 6 months.

1.5 Effects of the Company's operation during the year on the Interim Financial Statements:

- The maritime transport market in Quarter 2 in 2025 showed improvement compared to Quarter 1 in 2025 due to seasonal factors. However, overall market activity remained sluggish and uneven across different regions.

II. ACCOUNTING PERIOD AND ACCOUNTING CURRENCY**2.1 Accounting period:**

Annual accounting period commences from 01 January and ends as at 31 December.

2.2 Accounting currency :

The Company maintains its accounting records in VND.

III. STANDARDS AND APPLICABLE ACCOUNTING POLICIES**3.1 Applicable Accounting Policies**

The Company applies Corporate Accounting System issued under the Circular No. 200/2014/TT-BTC dated 22 December 2014 by the Ministry of Finance, the Circular No. 53/2016/TT-BTC dated 21 March 2016 issued by Ministry of Finance amending and supplementing some articles of the Circular No. 200/2014/TT-BTC and the Circular No. 202/2014/TT-BTC dated 22 December 2014 by the Ministry of Finance guiding the preparation and presentation of Consolidated Financial Statements.

3.2 Declaration of compliance with Accounting Standards and Accounting System

The Company applies Vietnamese Accounting Standards and supplementary documents issued by the State. Financial Statements are prepared and presented in accordance with regulations of each standard and supplementary document as well as with current Accounting Standards and Accounting System.

IV. PRINCIPAL ACCOUNTING POLICIES**4.1 Accounting estimates:**

The preparation of Consolidated Financial Statements in conformity with Vietnamese Accounting Standards, Vietnamese Corporate Accounting System and legal regulations relating to financial reporting requires the Board of General Director to make estimates and assumptions that affect the reported amounts of contingent liabilities and assets at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the fiscal year. Actual business performance may differ from these estimates and assumptions.

4.2 Cash and cash equivalents:

Principles for Determining Cash Equivalents: Cash equivalents are short-term investments with the maturity of not over than 3 months from the date of investment, that are highly liquid and readily convertible into known amount of cash and that are subject to an insignificant risk of conversion into cash.

4.3 Principles and Methods for Converting Foreign Currencies:

- Foreign currency transactions during the year are translated into Vietnam Dong according to the guidance in Circular No. 200/2014/TT-BTC dated December 22, 2014 and Circular No. 53/2016/TT-BTC dated March 21, 2016. All foreign exchange rate differences are recorded in financial income or financial expenses.
- Exchange rates are applied to revaluating monetary items denominated in foreign currencies as at June 30, 2025:

USD:	26.080 VND
EUR:	30.832 VND

- Exchange differences arising from revaluation of remaining foreign currency monetary items at the end of the period are implemented according to the guidance in Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance and Circular No. 53/2016/TT-BTC dated March 21, 2016.

4.4 Accounting Policies for Inventories:

Principles for Inventory Valuation:

- Inventories are initially recorded at cost including: purchasing costs, processing costs and other directly related costs incurred to bring the inventory to its location and condition at the time of initial recording. After initial recognition, at the time of preparing the Financial Statements, if the net realizable value of the inventory is lower than the original price, the inventory is recorded at the net realizable value.
- The purchasing cost of inventories consists of the buying price, non-refundable taxes, transportation cost, loading and unloading cost, preservation cost incurred in the buying process and other costs directly related to the purchase of the inventories.

The processing costs of inventories consist of those directly related to the manufactured products, such as cost of direct labor, fixed and variable general production costs incurred in the process of turning raw materials and materials into finished products.

Costs not permitted to be incorporated into the original price of inventories, are:

- Trade discounts and reductions in the prices of purchased goods due to their wrong specifications and/or inferior
- Costs of raw materials, materials, labor and other production and business costs incurred at a level higher than normal.
- Costs of inventories preservation minus the inventories preservation cost needed for subsequent production processes and the preservation cost incurred in the buying process.

- Selling expenses.
- General & administration expenses.

The cost of inventory is calculated by weighted average method.

Inventory is recorded by periodic method.

Provision for Devaluation of Inventory:

- As at June 30, 2025, the Company has not made any provision for the devaluation of inventories.
- Provision for devaluation of inventory, if any, is calculated and recognized as follows:

Provision for devaluation of inventories made at the end of the year is based on the excess of original cost of inventory over their net realizable value. The provision for devaluation of inventories is recognized in determined in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009, issued by the Ministry of Finance.

4.5 Principles for Recognizing Trade Receivables and Other Receivables:

Các khoản phải thu khách hàng, khoản trả trước cho người bán, phải thu nội bộ, và các khoản phải thu khác tại thời điểm báo cáo, nếu: The classification of receivables as trade receivables, prepayments to suppliers, intercompany

receivables, and other receivables at the reporting date, is made according to the following principles:

- Receivables with a repayment or settlement period of less than one year (or within one operating cycle) are classified as Current Assets.
- Receivables with a repayment or settlement period of more than one year (or beyond one operating cycle) are classified as Non-current Assets.
- Provision for Bad Receivable Debts: The provision for bad receivable debts represents the estimated loss in value of receivables that are expected not to be paid by customers at the date of the financial statements.

The level of provisions for bad receivable debts is recognized in accordance with Circular No. 48/2019/TT-BTC dated August 8, 2019, issued by the Ministry of Finance as follows:

- + 30% of the value of a receivable debt which has been overdue for between over 6 months and under one year.
- + 50% of the value of a receivable debt which has been overdue for between 1 year and under 2 years.
- + 70% of the value of a receivable debt which has been overdue for between 2 years and under 3 years.
- + 100% of the value of a receivable debt which has been overdue for 3 years or more.

4.6 Principles for Recognizing and Depreciating Fixed Assets:

Recognition of Fixed Assets (Tangible, Intangible, and Finance Lease Assets):

Fixed assets are initially stated at the historical cost. During the using time, fixed assets are recorded at cost, accumulated depreciation and carrying amount. The historical cost of a fixed asset comprises the purchase price, transportation costs, installation and testing expenses, import taxes (if any) and other costs of bringing the asset to its working condition for its intended use.

Depreciation Method for Fixed Assets (Tangible, Intangible):

Depreciation of fixed assets is provided using the straight-line method over the estimated useful life. The depreciation period is calculated according to the depreciation period prescribed in Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance. The depreciation periods applied are as follow:

- Buildings, structures	10 - 50 years
- Machinery, equipment	03 - 12 years
- Transportation equipment	06 - 20 years
- Office equipment	03 - 08 years

Basic depreciation of the fleet: The Company accounts for 100% of the basic depreciation costs of the fleet in accordance with Circular No. 45/2013/TT-BTC dated April 25, 2013.

* Gains or losses from the disposal or sale of fixed assets are recorded as a gain or loss during the period.

4.7 Principles for Recognizing Financial Investments:

Investments in subsidiaries, associates, and joint ventures: Initially recognized at costs from the date of investment or the date of purchase of shares or bonds.

Short-term and long-term securities investments: Securities investments at the reporting date, if:

- Investments with a maturity or redemption period of no more than 3 months from the date of purchase are considered "cash equivalents".

- Investments with a repayment period of less than one year or within one operating cycle are classified as current assets.

- Investments with a repayment period of more than one year or beyond one operating cycle are classified as non-current assets.

Other short-term and long-term investments:

- Investments with a maturity or redemption period of no more than 3 months from the date of purchase are considered "cash equivalents".

- Investments with a repayment period of less than one year or within one operating cycle are classified as current assets.

- Investments with a repayment period of more than one year or beyond one operating cycle are classified as non-current assets.

Method of establishing provisions for impairment of short-term and long-term investments: Provisions for impairment of short-term and long-term investments are made in accordance with Circular No. 48/2019/TT-BTC dated August 8, 2019, issued by the Ministry of Finance.

Disposal of an investment: The difference between the net proceeds from disposal and the carrying value is recognized as income or expense.

4.8 Principles for Recognizing and Capitalizing Borrowing Costs:

Borrowing costs that are directly attributable to the acquisition, construction, or production of qualifying assets are capitalized as part of the asset's cost. These include interest expenses, amortization of discounts or premiums on bond issuance and ancillary costs incurred during the borrowing process.

The capitalization of borrowing costs should be temporarily suspended in periods during which the investment in construction or production of uncompleted assets is interrupted, except for cases where such interruption is necessary.

The capitalization of borrowing should cease when substantially all of the activities necessary to prepare the asset for its intended use or sale are complete. Borrowing costs arising afterward should be recognized as in-period production or business costs.

Income generated from the temporary investment of specific borrowings, pending their utilization for the acquisition of qualifying assets, must be deducted from the borrowing costs eligible for capitalization.

The amount of borrowing costs capitalized during a period must not exceed the amount of borrowing costs incurred during that period. Interest expenses and the amortization of discounts or premiums capitalized during a period must not exceed the actual interest incurred and the amount of discounts or premiums amortized during that period.

4.9 Principles for Recognizing and Capitalizing Other Costs:

Prepaid Expenses: Prepaid expenses that directly related to the current financial year's business operations are recognized as short-term prepaid expenses. The following expenses incurred during the financial year are recorded as long-term prepaid expenses and are gradually allocated to the operating results:

- + Tools and equipment with significant value that have been allocated for use;
- + Extraordinary repair costs for fixed assets that are significant and incurred as a one-time expense.

Other Expenses: Costs incurred during the period that are not related to the core business operations are recognized as other expenses.

Method of Allocating Prepaid Expenses: Short-term prepaid expenses are allocated over a period of one year, while long-term prepaid expenses are allocated over a period from 2 to 3 years.

4.10 Recognition of Accrued Expenses, Provision for Major Repairs and Warranty Costs:

- Actual expenses that have not yet been incurred but are deducted in advance from production and business expenses in the period to ensure that when actual expenses arise, they do not cause sudden changes in production and business expenses on the basis of ensuring the principle of matching between revenue and expenses.

When such costs arise, if there is a difference with the amount deducted, the accountant will record additional or reduce the cost corresponding to the difference.

- For specific fixed assets whose repair is cyclical, the major repair costs for these assets are provided based on estimates or plans and are recorded as production and business expenses.

4.11 Principle of recognition of equity:

Principles for Recognizing Owner's Equity, Capital Surplus, and Other Capital: Owner's equity is stated at actually contributed capital of owners. Shareholders' contributions consist of both the nominal value of the shares and any amount exceeding the nominal value, which is classified as capital surplus (additional paid-in capital).

Principles for Recognizing Retained Earnings:

Retained earnings are recognized from the operating results of the company for the period, after deducting the income tax expenses for the current year and adjustments for the retrospective application of changes in accounting policies and retrospective corrections of material errors from the prior year.

Recognition of Investment and Development funds, Other Reserves: Recognized based on the resolutions of the Annual General Meeting of Shareholders.

4.12 Principles and Methods for Recognizing Revenue:

Revenue from sale of goods:

Revenue from sale of goods is recognized when all of the following conditions are satisfied simultaneously:

- + The majority of risks and benefits associated with the right to own the products or goods have been transferred to the buyer;
- + The Company no longer holds the right to manage the goods as the goods owner, or the right to control the goods;
- + The amount of the revenue can be measured reliably;
- + The company has gained or will gain economic benefits from the sales of goods;
- + The costs incurred or to be incurred in respect of the transaction can be measured reliably;
- + Revenue should be recognised by reference to the stage of completion of the transaction at the balance sheet date using the percentage-of-completion method.

Revenue from rendering of services:

Revenue from rendering of services: is recognized when the amount of revenue can be measured reliably. In cases where the service provision relates to multiple periods, revenue should be recognised by reference to the stage of completion of the transaction at the balance sheet date (the percentage-of-completion method). Revenue from the rendering of services is recognized when all of the following conditions are satisfied simultaneously:

- + The amount of the revenue can be measured reliably;
- + The company will gain future economic benefits from rendering of services;
- + Determine the work completed on the Statement of Financial Position; and
- + The costs incurred, or to be incurred, in respect of the transaction can be measured reliably.

Financial Income:

Financial Income: Revenue arising from the used by the others of entity assets yielding interest, royalties and dividends shall be recognised when:

- + It is probable that the economic benefits associated with the transaction will flow to the Company; and
- + The amount of the revenue can be measured reliably.

4.13 Principles and methods for recognizing current corporate income tax expenses:

- The Company is subject to a corporate income tax rate of 20% for business activities generating income subject to corporate income tax.
Corporate income tax expenses for the period comprise current corporate income tax expenses and deferred corporate income tax expenses.
- + Current corporate income tax expenses are determined based on taxable income during the period and current corporate income tax rate. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting as well as adjustments for non-taxable or non-deductible income and expenses.
- + Deferred tax is provided using liability method on temporary differences at the balance sheet date between the tax base of assets and liabilities and their carrying amount for financial reporting purposes.

Deferred tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are recognized only to the extent that it is probable that taxable profit will be available against which deductible temporary differences.

- + The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilised.
- + Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the assets is realized or the liabilities is settled based on tax rates and tax laws that have been enacted at the balance sheet date. Deferred tax is recorded in the interim consolidated income statement, except when it relates to items recognized directly to equity, in which case the deferred tax is also dealt with in the equity account.
- Deferred tax is classified as a long-term liability.

4.14 Recognition of trade payables and other payables:

Accounts payable to suppliers, intra-company payables, other payables, and loans at the reporting date, if:

- + Payables with a payment term of less than 1 year or within a business cycle are classified as current liabilities.
- + Payables with a payment term of more than 1 year or beyond a business cycle are classified as non-current liabilities.

Shortage of assets awaiting resolution are classified as current liabilities.

- in circulation in the period				
- Basic earnings per share		1.324		2.645

36 Explanation for the change by more than 10% in the 2nd quarter 2025 business results compared to the same period last year:

Profit after tax declined by nearly VND 84 billion (equivalent to a 95% decrease), mainly due to a reduction of approximately VND 89 billion in other income. The main reason is that in Quarter 2 in 2024, the Company recorded income from interest forgiveness of over VND 92 billion, related to overdue interest on loans for newbuilding vessel projects financed by the Vietnam Development Bank.

VII. OTHER INFORMATION

37 Financial instruments

1 Financial instruments

The company implements capital management to ensure that it can both operate effectively and maximize shareholder value by utilizing its capital efficiently.

Capital structure of the Company consists of: the Charter Capital plus (+) Share Premium, less (-) Treasury Shares (if any).

2 Financial Assets

Financial assets refer to assets that arise from contractual agreements on future cash flows. These assets have been remeasured at fair value at the date of the preparation of the financial statements:

	Carrying value	Fair value
- Cash and cash equivalents	20.265.211.218	20.265.211.218
- Trade receivables, other receivables	125.794.509.612	125.630.387.021

3 Financial liabilities

The financial liabilities have been revalued in accordance with the provisions of the current accounting standards to ensure the Company's payment obligations. Specifically, accounts payable to suppliers and foreign-currency-denominated loans are revalued at the exchange rate quoted by the transacting bank at the reporting date. Additionally, interest expenses payable have been recognized in the period and recorded in the income statement.

As at 30/06/2025

- Borrowings and debts	298.918.821.591
- Trade payables	77.711.099.728
- Other payables	546.857.906.859

4 Financial risk management:

Financial risk includes market risk, credit risk, liquidity risk, and cash flow risk. The Company does not implement measures to mitigate these risks due to the lack of a market for purchasing such instruments.

Market risk: The Company purchases raw materials, goods, tools, and supplies from both domestic and foreign suppliers to support its business operations. Therefore, the Company is exposed to the risk of fluctuations in the prices of these materials, goods, tools, and supplies. This risk is mitigated by sourcing from a diverse range of suppliers located in various countries and regions, as well as maintaining flexibility in negotiating and adjusting sale prices to customers in response to significant price fluctuations in the market.

Credit risk: Consist of liquidity risk and interest rate risk: The purpose of liquidity risk management is to ensure that funds are available to meet current and future liabilities. The Company's policy is to regularly monitor the liquidity requirements for current and expected future liabilities to ensure that sufficient cash is maintained to meet short-term and long-term liquidity needs.

Due date for payment of financial liabilities based on expected payment under the contracts as at 30/06/2025:

Item	Under 1 year	From 1 to 5 years	From more than 5 years	Total

41 Comparative Figures

The corresponding figures are those taken from the accounts for the fiscal year ended as at December 31, 2024 which was audited by AASC Auditing Firm Company Limited.

42 Going Concern Disclosures

The Board of Directors affirms that the Company will continue its operations in the next fiscal year.

43 Other Information

The Company's tax settlements are subject to examination by the tax authorities. Because the application of tax laws and regulations on many types of transactions is susceptible to varying interpretations, amounts reported in the financial statements could be changed at a later date upon final determination by the tax authorities.
